

Typography Exercise One: Implied Meaning

Take a look at each of the words below.

lontano (*Italian translation of the word "distant"*)

Glatt (*German translation of the word "slick"*)

Arrugarse (*Spanish translation of the word "crumple"*)

Now, in each of the boxes below, write/draw the translated (not the English) word. Try to write/draw the word in such a way so that someone else could decipher what the word is without seeing the English word meaning.

An example: The German word "allein" means "alone," so you could write/draw the "allei" together and the "n" all by itself in a corner.
